Front-End Developer with **5.3 years** of experience implementing scalable web applications using React.JS/NextJS, TypeScript, Redux Toolkit, React-Router, Hooks, Javascript ES6, SASS, modules CSS, CSS3, and some libraries such as Ant Design, Tailwind, Semantic UI and Material UI. Contributed to the digital transformation of financial and tech companies by applying Agile methodologies, automated testing, and clean code practices. Eager to continue learning and delivering high-impact solutions in collaborative teams.

FICOHSA GROUP, Front-End Developer (Tegucigalpa - Honduras) — *June, 2022 - October, 2025*
- Built modern, accessible, and high-performance interfaces aligned with UI/UX designs.
- Delivered continuous deployments on Azure improving speed and system reliability.
- Integrated frontend with backend services via Azure VPN and monitored production logs.
- Collaborated with cross-functional teams using Jira, Bitbucket, and Scrum practices.

Tech Stack: React.JS/NextJS, Redux Toolkit, Hooks, Typescript, SASS, Javascript ES5-ES6, Tailwind, Unit Testing using RTL, Storybook, Git.

Vale Latam, Front-End Developer (Quito - Ecuador) — *August, 2021 - March, 2022*
- Implemented responsive pages with the objective that all pages can be accessed from any browser or device by potential clients.
- Worked together with the UI/UX designer to design some interfaces and change others. I proposed about 10% of the design of all interfaces in the mockups.
- Applied best coding practices to improve the page speed and accessibility of the web page.

Tech Stack: React.JS/Redux, Hooks, React Router, HOC, Typescript, SASS, Javascript ES6 and Ant Design.

Freelance - Rolf Wittmer Fullstack Developer (Quito - Ecuador) — *February, 2020 - March, 2021*
- Updated the old web application of the company using the new technologies to implement the Frontend and the Backend sides. Enhancing 100% of all administrative processes.
- Implemented all forms to record information automatically of cabins, captains, beds, cruises, passengers, and other sections.
- Use of MVC architecture to improve the flow of information between Frontend and Backend.
- Implemented another project using Javascript and RabbitMQ to handle emails between users and the web system.

Tech Stack: JavaScript ES6, React.JS/Redux, Express.JS, MYSQL.
